

## [Guide] Bevi Standup 2.0 - Enabling Touchless Dispense

## Overview

Bevi Touchless Dispense gives users of the Bevi the option to dispense a drink by using their cell phone instead of touching the dispense screen. Once scanning the QR code displayed on the main screen of the Bevi, the user will be prompted to open a web app that will display the dispense screen on their smartphone. After placing a glass in the dispense area, they can use their phone to select and pour a Bevi drink.

## Task 1: Enabling Touchless on a Bevi Standup 2.0

To enable Touchless Dispense, the machine must be connected to the internet, and you must have access to the machine via "The Well" (well.bevi.co)

## Task 2 - Testing Touchless on the Machine you just enabled

1. When looking at the machine, you should see our dispense screen OR our screensaver animation playing. There should also now be a QR code displayed.

- 2. Scan the QR code using the camera function of your phone.
- 3. Open the link that appears on your phone's screen

4. The Bevi Dispense screen will appear on your phone

5. Place a glass in the dispense area of the machine and make a selection. Once your selection is complete (selected items will grey out) then press and hold the "Pour" button until you dispense the desired amount you wish. Once your dispense is complete, you have set up Touchless for all to enjoy!

If you have any questions or issues implementing the Touchless feature please contact support@bevi.co
