

# [Guide] Post Service Check

## Overview

This guide is intended to instruct technicians how to perform a post service check of the Bevi machine after completing service. It is important to check all Bevi functions before proceeding on from a service call to ensure everything is working properly.

## Frequently Asked Questions

*Q: Why do I need to do a final check?*

*A: To ensure that still, sparkling and flavored water all function properly after servicing.*

*Q: Should a post service check be done after every service?*

*A: Yes, conducting a post service check after every service helps identify unknown issues and cuts down return visits.*

## Required Tools & Materials

- 1L bottle
- Microfiber cloth
- Cleaning brush

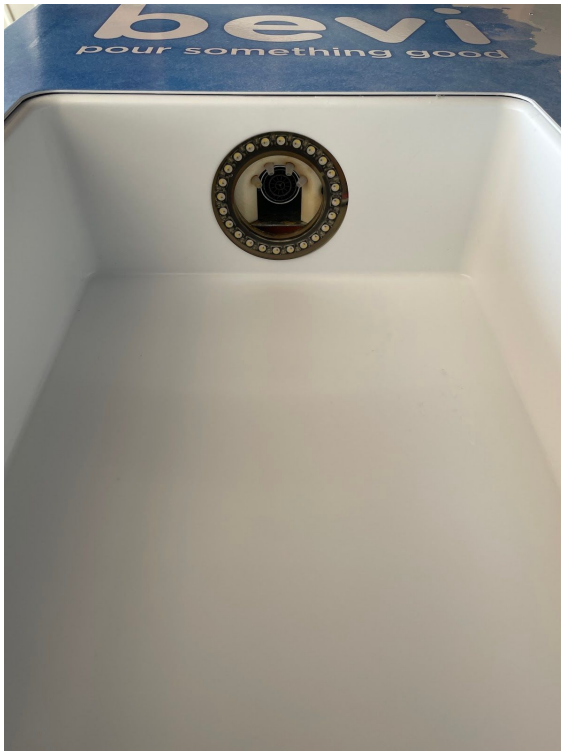

## Task 1: Dispensing

1. Dispense 0.5L of still water.
2. Dispense 1.5L sparkling water.
3. Dispense all 4 flavored water options to ensure flavor is dispensing properly.

## Task 2: Cleaning

1. Clean any liquids or stains from the dispense area.
2. Clean any liquids or stains from the nozzle.

3. Clean/Empty the drip tray.

**Process Complete**
