

Bevi Filtration System

Every Bevi machine offers advanced water filtration for a trusted and great-tasting drinking experience. Combining the effectiveness of 0.2-micron media filtration and premium carbon block filtration, this innovative system removes 99.9% of contaminants, leaving you with water that's deliciously pure and refreshing.

Great Taste

Bevi's filtration removes contaminants but retains essential minerals, ensuring water keeps its health benefits and tastes delicious at the same time.

Premium Filtration removes even the smallest impurities, including:

- Effectively all microplastics typically found in drinking water
- 99.9% of bacteria, cysts and parasites
- 99.9% of other sediment

Performance you can trust:

- Filtration certified to NSF/ANSI Standard 42, 53, and CSA B483.1
- High-throughput commercial-grade filter for fast dispenses
- Monitored remotely by your Bevi service provider
